<b>Office Action Summary</b>	<b>Application No.</b> 10/767,333	<b>Applicant(s)</b> OGATA ET AL.	
	<b>Examiner</b> Robert S. Tupper	<b>Art Unit</b> 2627	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-11 are rejected under 35 USC 112, first and second paragraphs, as the claimed invention is not described in such full, clear, concise, and exact terms as to enable any person skilled in the art to make and use the same, and/or for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention.

The specification and claims state that the shafts are attached to the recording medium. This is clearly in error.

These claims are inadequately disclosed under 112 par.1 if read literally to require that the shafts be attached to the recording medium. Note that claim 1 is read in light of the disclosure to define the term "object".

Alternatively, these claims are indefinite, misleading, and misdescriptive under 112 par.2 for failing to accurately recite the connection of the elements.

Further, the specification is also misleading and misdescriptive.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by ANDO et al (5,379,990).

Note figures 1-7. ANDO et al shows a disc drive (see figure 6) with at least three shaft units (31) mounted to the disc drive, each shaft unit projecting into an cylindrical-shaped opening in an elastic member (34). The elastic member is contained in a housing such that it is constrained in both the axial and radial directions of the shaft.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Patents 6,543,738 and 4,553,231 are cited for further showings of disk drive vibration mounting systems of interest.
